## 7.10 AIM-54 PHOENIX - OVERVIEW

- **Missile Preparation**

- **Weapon Cooling**

- AIM-54 requires liquid cooling
- RIO enabled **LIQUID COOLING** switch

- **MSL PREP**

- AIM-54 must be tuned to AWG-9
- Either press **MSL PREP** button
- Or activation of **ACM**

- **Launch Modes**

- **PDSTT SARH**

- AIM-54 uses SARH all the way to target
- Faster update rate than TWS
- **Slightly increased effective range** as compared to a TWS launch

- **TWS SARH/ARH**

- Allows **6 AIM-54 launches at 6 targets**
- Missile is initially SARH guided
- When within AIM-54 seeker range AWG-9 sends activation command
- **Not Fire and Forget:** Requires automatic activation command

- **ACM Active**

- Activated when **BRSIT** selected
- Or when **ACM** active with no radar track
- Missile commanded active **before launch**

- **MSL SPD GATE Switch**

- **NOSE QTR**

- Standard setting in DCS

- **All Others**

- Not simulated
